

Syndiant Named 2025 Top Microdisplay Technology

Category: Company news Release time: 2025-10-22 15:16:53

Syndiant, a leader in Liquid Crystal on Silicon (LCoS) microdisplays, has been recognized by Semiconductor Review with its 2025 Top Microdisplay Technology Award. The company also earned a spot on the Top Semiconductor Manufacturing Services list, underscoring its role as a driver of innovation in the semiconductor industry.

Known for delivering high-resolution, low-power, and compact display solutions, Syndiant's technologies power automotive displays, projectors, and wearable devices worldwide. Its XDMicro manufacturing facility in China, combined with a network of global partners, allows Syndiant to bring cutting-edge designs from concept to reliable, real-world deployment.

"Receiving this recognition reflects our ongoing commitment to innovation and quality," said Daniel Wong, CEO at Syndiant. "We continue to push the boundaries of LCoS technology to meet the evolving demands of our customers across multiple industries. With a focus on precision, efficiency, and real-world performance, Syndiant is shaping the future of microdisplay technology and solidifying its reputation as a trusted partner for global display solutions."
